

# Poolmate Mini Carrier

Integrated Organized Aesthetic Sturdy

| For Robotic Pool Cleaner

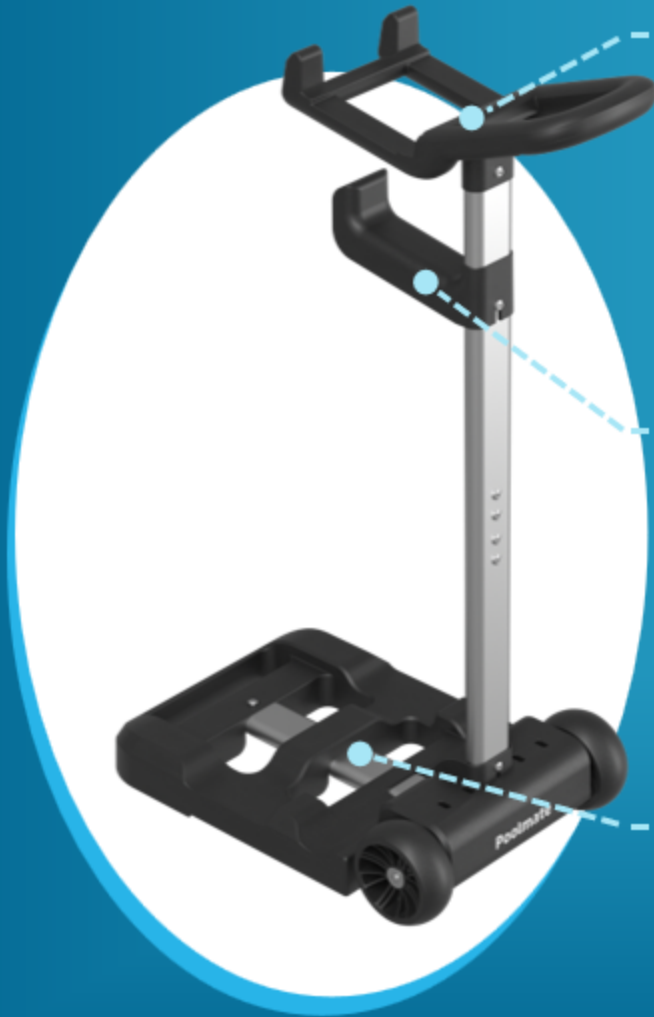

### Poolmate Mini Carrier

Poolmate Mini Carrier is a robotic pool cleaner caddy, which is applicable for all Poolmate robotic pool cleaners. The carrier adopts function division design that facilitate storage. The groove base provides considerate protection to the brushes. Relying on sidewheels, you can easily transport the pool cleaner. The elegant structure, carry-on weight and high durability make Poolmate Mini Carrier the finest gear in transporting and storing robotic pool cleaner.

# Function division, integrated storage

Poolmate Mini Carrier has 3 function sections

The top bracket supports control box which is safe from water

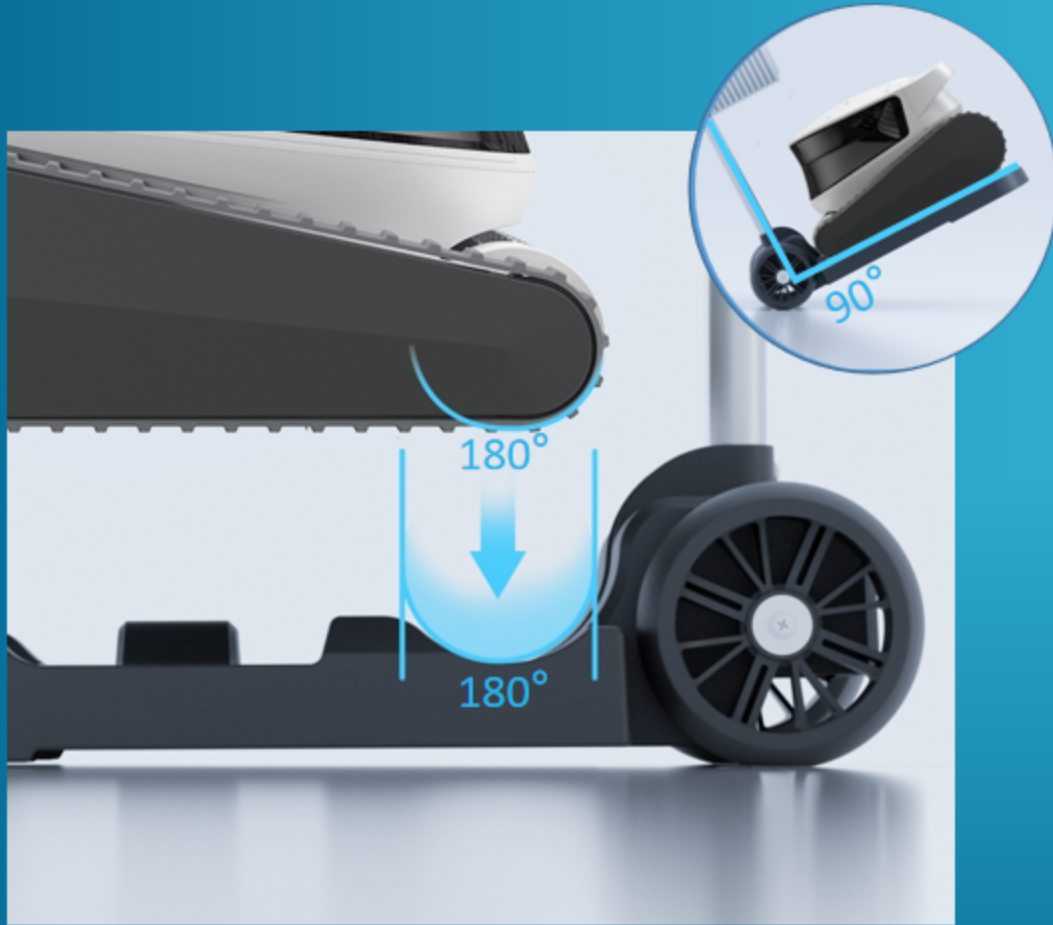

The middle hook holds buoyancy cable with no-kink

The base is for robot placing Integrated and organized, easy to transport

\* Display only, the detailed configuration is subject to the listed products.

# Groove base provides considerate protection

The carrier base uses a groove design to keep the robot stable, stop it from slipping. Prevent the brushes and track wheels from deformation due to gravity extrusion.

Robot water drainage is facilitated by the base and bottom brackets.

# Sidewheels supply easy mobility

The wheels on both sides of the base are sturdy and wear-resistant, which saves efforts, and make the carrier ideal for long-distance transporting

\* Display only, the detailed configuration is subject to the listed products.

# Elegant structure, carry-on weight, high durability

Poolmate Mini Carrier has a compact size and adopts materials like PC+ABS, 6061 aluminum alloy and PU. It only weights 3.6kg.

It only weights  
**3.6kg**

# Product parameters

Product Dimension (Assembled)	640*350*970mm
Package dimension	535*415*160mm
Net weight	3.6kg
Gross weight	4.6kg
Main materials	PC +ABS、6061 aluminum alloy、PU
